

## REMARKS

Due to an apparent oversight at the Patent Office, an objection to the informal drawings was not lodged until after allowance of the case. During preparation of the formal drawings, it was necessary to split Figure 27 into two parts to maintain a readable text size. The above amendments correct the references to Figure 27 in the specification to correspond to the formal drawings.

During preparation of Figure 4, the draftsman noted that reference number 406 was used for two different elements in the informal drawings. Accordingly, the reference number for the "setup" button was changed to 405 to distinguish it from "refresh" button 406. A corresponding change is made in the specification where it references the setup button.

These amendments are not substantive and do not introduce new matter. Approval of the amendments is requested.
